Foreword

The main purpose of the present leaflet is to provide the reader with a short overview of the projects, sponsored by national and international organizations and agencies, presented at COLING 92 in Nantes.

The information in this brochure was provided by the various projects, compiled by the services of the Commission of the European Communities. It appears as a supplement of the journal 'Linguistica Computazionale' published by the Istituto di Linguistica Computazionale of the CNR in Pisa, Italy.

We thank all contributors for their effort in providing the necessary information and apologize in advance for possible accidental mistakes caused by the unavoidable text manipulation we had to perform in compiling the submissions we received.

We have taken this opportunity to include information on some other multi-national funded projects beyond those officially represented at COLING92 for which we had information available. Although the picture which results from this is not complete, not even concerning Europe, we hope that, based on the present version, we will be able to compile a more complete catalogue of NLP projects in the future.

NLP projects interested in being represented in this catalogue can manifest their interest in mailing to the following address:

nino@eurokom.ie

We will reply by sending to the interested parties a style sheet for the submission of project information.

In order to improve the content and presentation of the present version, we welcome comments on this brochure.

Giovanni Battista Varile, CEC, Luxembourg
Antonio Zampolli, ILC, Pisa
