

# Plenary: the future of Internet filtering

A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

[WWW.POESIA-FILTER.ORG](http://WWW.POESIA-FILTER.ORG)

Information Society

**Karl Donert, Liverpool Hope University College**

# Future Questions

1. What lessons do you think have been learned from the POESIA and other filtering projects?

Where might these lessons be best exploited and how?

# Future Questions

2. What filtering developments might be considered most important for the future?  
Building for other languages?  
Different media?  
Mobile technologies?  
For different content/domains/channels?

# Future Questions

3. Is Open Source a mechanism by which filtering can keep ahead of technological and advances?

If so what should be done to promote investment in it?

# Questions

4. What mechanisms might/ought to be used to promote the use of filtering?  
How can we reach key target audiences?

# Questions

5. Can we afford not to invest in an education – training – End User dimension?

Understanding the issues from this point of view?

# Questions

6. If filtering becomes a legal requirement in Europe, are we able to effectively advise and implement?

# Questions

7. How can we promote sustainability of such OSS filtering initiatives given unstable environment of harmful content and the short project life cycle?

# Questions

8. Is the mass market ready for such products? If so what will/should we do about it?

# Questions

9. Comment on the relative importance of prevention and cure?

How about technical and non-technical approaches.
