A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

# Poesia software architecture

A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

## Poesia requirements

- Classroom traffic filtering
- →No configuration on filtered workstations
- No mean to avoid the filter

A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

## **Development context**

- Open-source development
- → Linux
- **EEC Safer Internet Action Plan**

A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

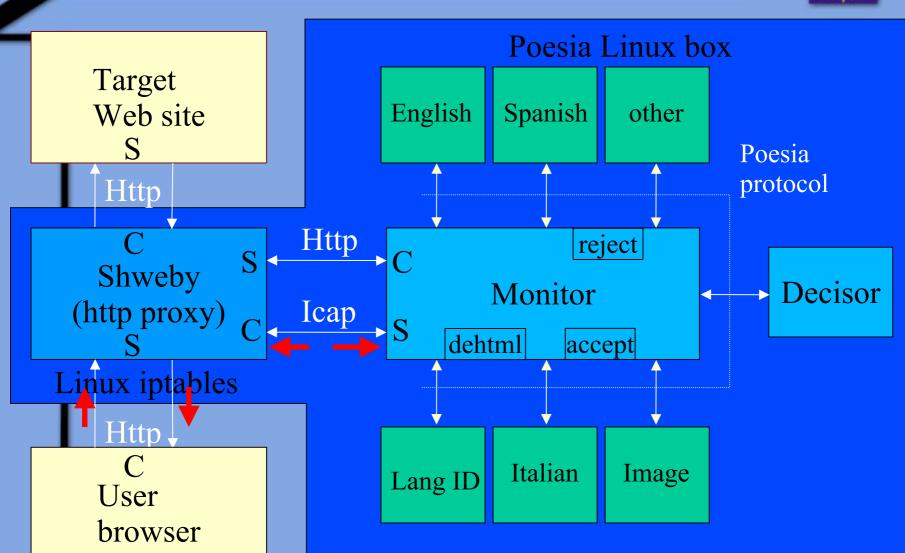

## Development constraints

- Collaborative distributed devpt
- Different devpt cultures
  - → Natural Language Processing experts
  - **→** Image experts
  - **Existing source code base**
  - → Different "prefered" language
- Internet standards compliance

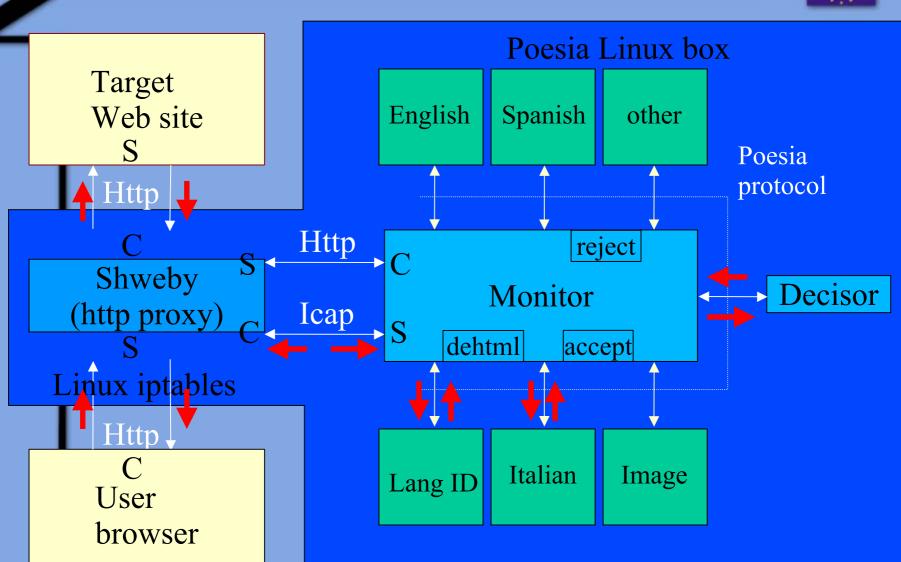

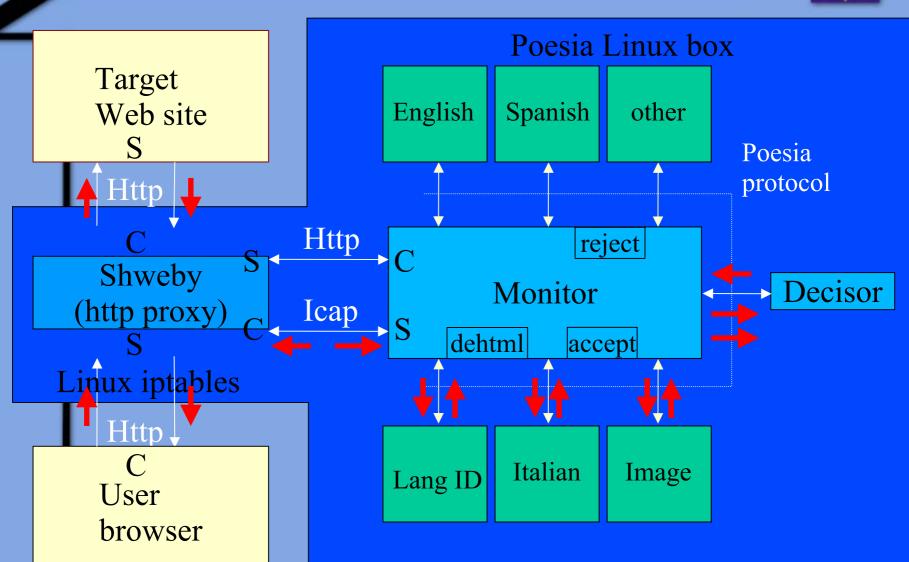

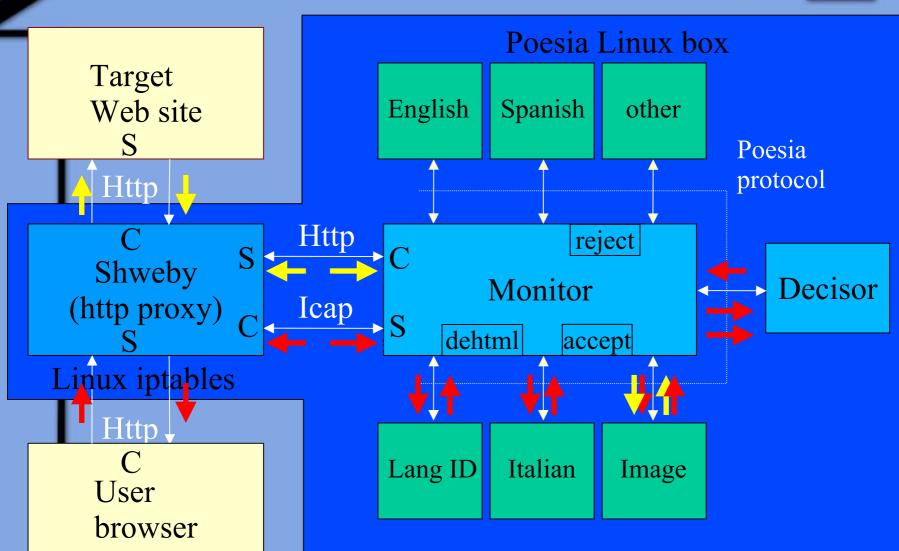

A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

## **Technical choices**

- **→**Modularity: 1 kind of filter: 1 executable
- → Hub architecture
- → Communications
  - → Message based
  - →Monitor <-> Filter only
  - →Unix pipes
- **Central decision mechanism**
- →ICAP compliance

### Message-based communication

Pros

Cons

→Low coupling

- **→**Loose type checking
- →Independance / →Finally, not the programming language
- announced Babel tower
- protocol
- **→**Debug text-based **→**Parsing and message handling overhead
- → Pipe performance → No possible machine
- distribution

A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

## **Modularity**

- → More different natural languages
- Other kind of filters?

## Reusability

- Decisor, Image and Spanish filter use common base classes
- Common poesia protocol handling library
- Reusable framework for new filters

A PUBLIC OPEN-SOURCE ENVIRONMENT FOR A SAFER INTERNET ACCESS

## Return on experience (about software engineering)

#### **Positive**

- Collaborative development
  - hierarchy of makefiles
  - ->cvs
- → Modular architectures
- **Common library and framework**

- Improvements
- Earlier integration with « empty shell » modules
- More automated unit and integration testing
- Less different technologies
- More technology recommendations
